

The following schools/departments have previously awarded academic credit for EcoFS courses. Please note- if your school *is* on this list it does not guarantee prospective students will successfully transfer credits for their unique degree situation. Also if your school/department *is not* on this list it is still possible to transfer credits, just speak to an advisor from your school. EcoFS requires students confirm with their university/department the acceptance of transfer credits for EcoFS courses. Finally many students take this course without seeking academic credit.
